***Response to Amendment***

1. The amendment filed on December 21, 2007 has been accepted and entered.

***Allowable Subject Matter***

2. Claims 3 and 6-9 are allowed.
3. The following is an examiner's statement of reasons for allowance:

Regarding claim 3, none of the prior art of record specifies or makes obvious a PET scanning system, namely the combination of elements where the PET scanner comprises a detector made of  $\text{LaBr}_3$  or  $\text{LaCl}_3$  that have the claimed decay time constant and light output in combination with the time stamp circuit and the claimed processor.

The Van Loef reference discloses the particular scintillator and describes generally medical applications of the scintillator, but it does not specify the claimed processor/time stamp along in combination with the particular scintillator. Although time stamp circuits and processors are generally known elements in TOF-PET systems, the particular time stamp circuit/processor as claimed corrects the deficiencies presented by the scintillator material. Applicants explained during the interview on December 19, 2007 (see attached Interview Summary) that the scintillator materials  $\text{LaBr}_3$  or  $\text{LaCl}_3$  were not particularly good materials for PET detectors because they did not possess characteristics that were favorable for TOF-PET detection. Further, applicants stated that the deficiencies of the scintillator were corrected by the claimed time stamp/processor circuit to reduce the deficiencies that were inherently present because of the scintillator material.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue

fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
